

# **Quick Start**

### o FCC Regulations:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -Reorient or relocate the receiving antenna.
- -Increase the separation between the equipment and receiver.
- -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -Consult the dealer or an experienced radio/TV technician for help.

#### FCC Note:

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## **RF Exposure Information (SAR)**

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the United States.

During SAR testing, this device was set to transmit at its highest certified power level in all tested frequency bands, and placed in positions that simulate RF exposure in usage against the head with no separation, and near the body with the separation of 10 mm. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The exposure standard for wireless devices employing a unit of measurement is known as the Specific Absorption Rate, or SAR.

The SAR limit set by the FCC is 1.6W/kg.

This device is complied with SAR for general population /uncontrolled exposure limits in ANSI/IEEE C95.1-1992 and had been tested in accordance with the measurement methods and procedures specified in IEEE1528.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the

Display Grant section of www.fcc.gov/oet/ea/fccid after searching on FCC ID: 2AD83POD-3-1.

For this device, the highest reported SAR value for usage near the body is 1.10 W/kg.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirements.

SAR compliance for body-worn operation is based on a separation distance of 10 mm between the unit and the human body. Carry this device at least 10 mm away from your

body to ensure RF exposure level compliant or lower to the reported level. To support body-worn operation, choose the belt clips or holsters, which do not contain metallic components, to maintain a separation of 10 mm between this device and your body. RF exposure compliance with any body-worn accessory, which contains metal, was not tested and certified, and use such body-worn accessory should be avoided.

Dt

# For EU

The device could be used with a separation distance of 5mm to the human body.

Hereby, Pod Trackers Inc declares that the radio equipment type POD-3 is in compliance with Directive 2014/53/EU.

The full text of the EU declaration of conformity is available at the following internet address: podtrackers.com

This radio equipment operates with the following frequency bands and maximum radio-frequency power:

Operating Mode	Operating Frequency Range		Maximum
	TX(MHz)	RX(MHz)	Transmit Power (Conducted) dBm
GSM850	824 - 849	869 - 894	
GSM900	880 - 915	925 - 960	
GSM1800	1710 - 1785	1805 - 1880	
GSM1900	1850 - 1910	1930 - 1990	
3G BAND I	1920 - 1980	2110 - 2170	
3G BAND II	1850 - 1910	1930 - 1990	

3G BAND V	824 - 849	869 - 894	
3G BAND VIII	880 - 915	925 - 960	
Operating Mode	Operating Frequency Range		Maximum Transmit Power
	TX(MHz)	RX(MHz)	(EIRP) dBm
Bluetooth	2402 - 2480		
WLAN 2.4GHz	2412 - 2472		
Operating Mode	Operating Frequency Range		Support
FM	87.5 -108		Υ
GPS	1559-1610		Υ
GLONASS	1559 -1610		Υ
